

AI Driven Campus Monitoring & Resolution Platform

Team name : Curated Coders

College Name : IIT Sonapat

Shivanshu Mangal (1st Year)

Kunal (1st Year)

Sparsh Agarwal (1st Year)

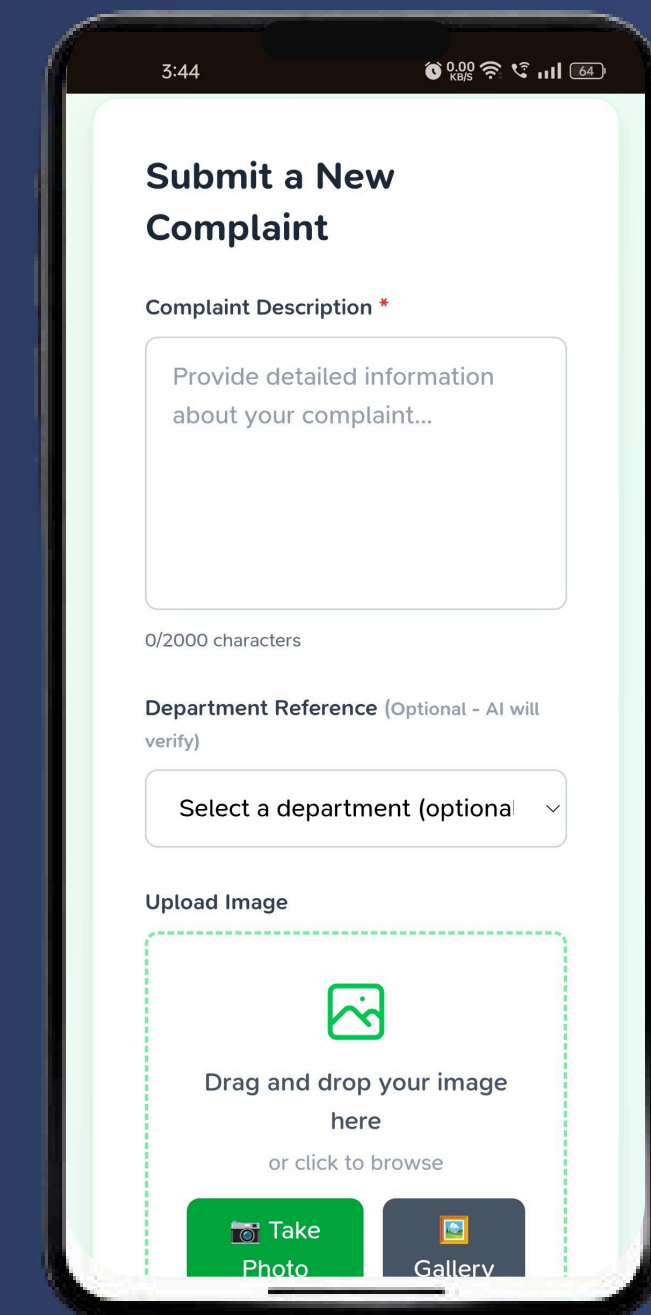

Hannu Verma (1st Year)

Problem & Solution

Proposed solution :

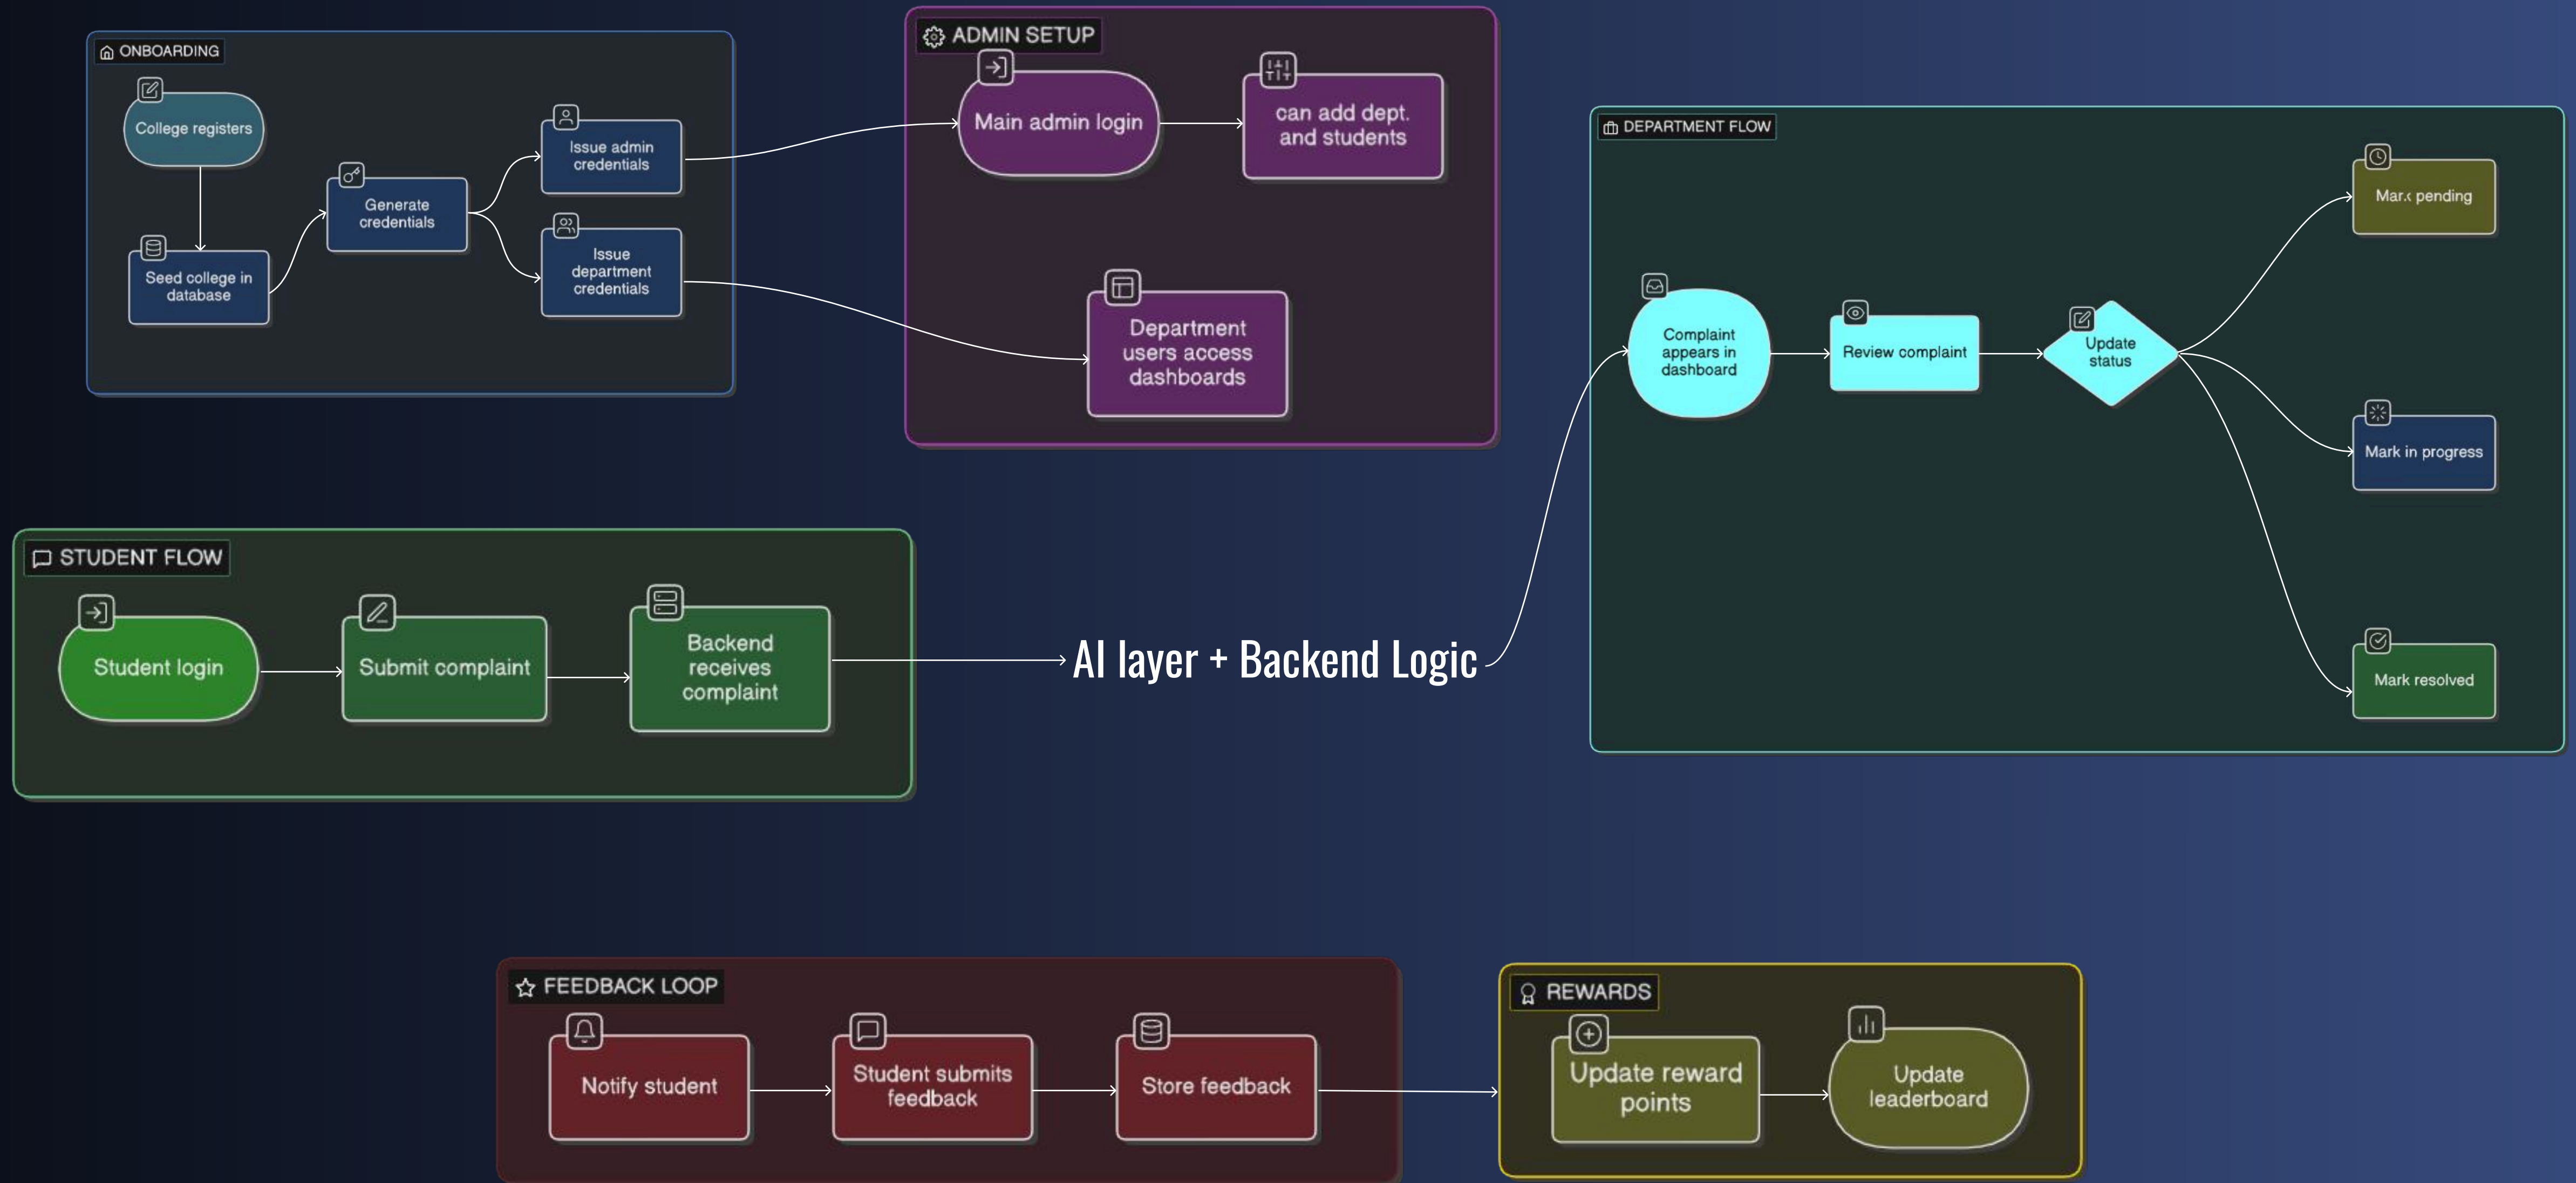

- Develop a **mobile-based AI-powered** platform for reporting and resolving campus issues
- Users upload a photo of the issue along with a short description.
- **AI analyzes image and text** to identify category, severity, and location.
- System automatically generates and routes ticket to the responsible department
- Department updates status and uploads proof after fixing the issue.
- User provides feedback and rating after resolution.
- System maintains performance score for each department

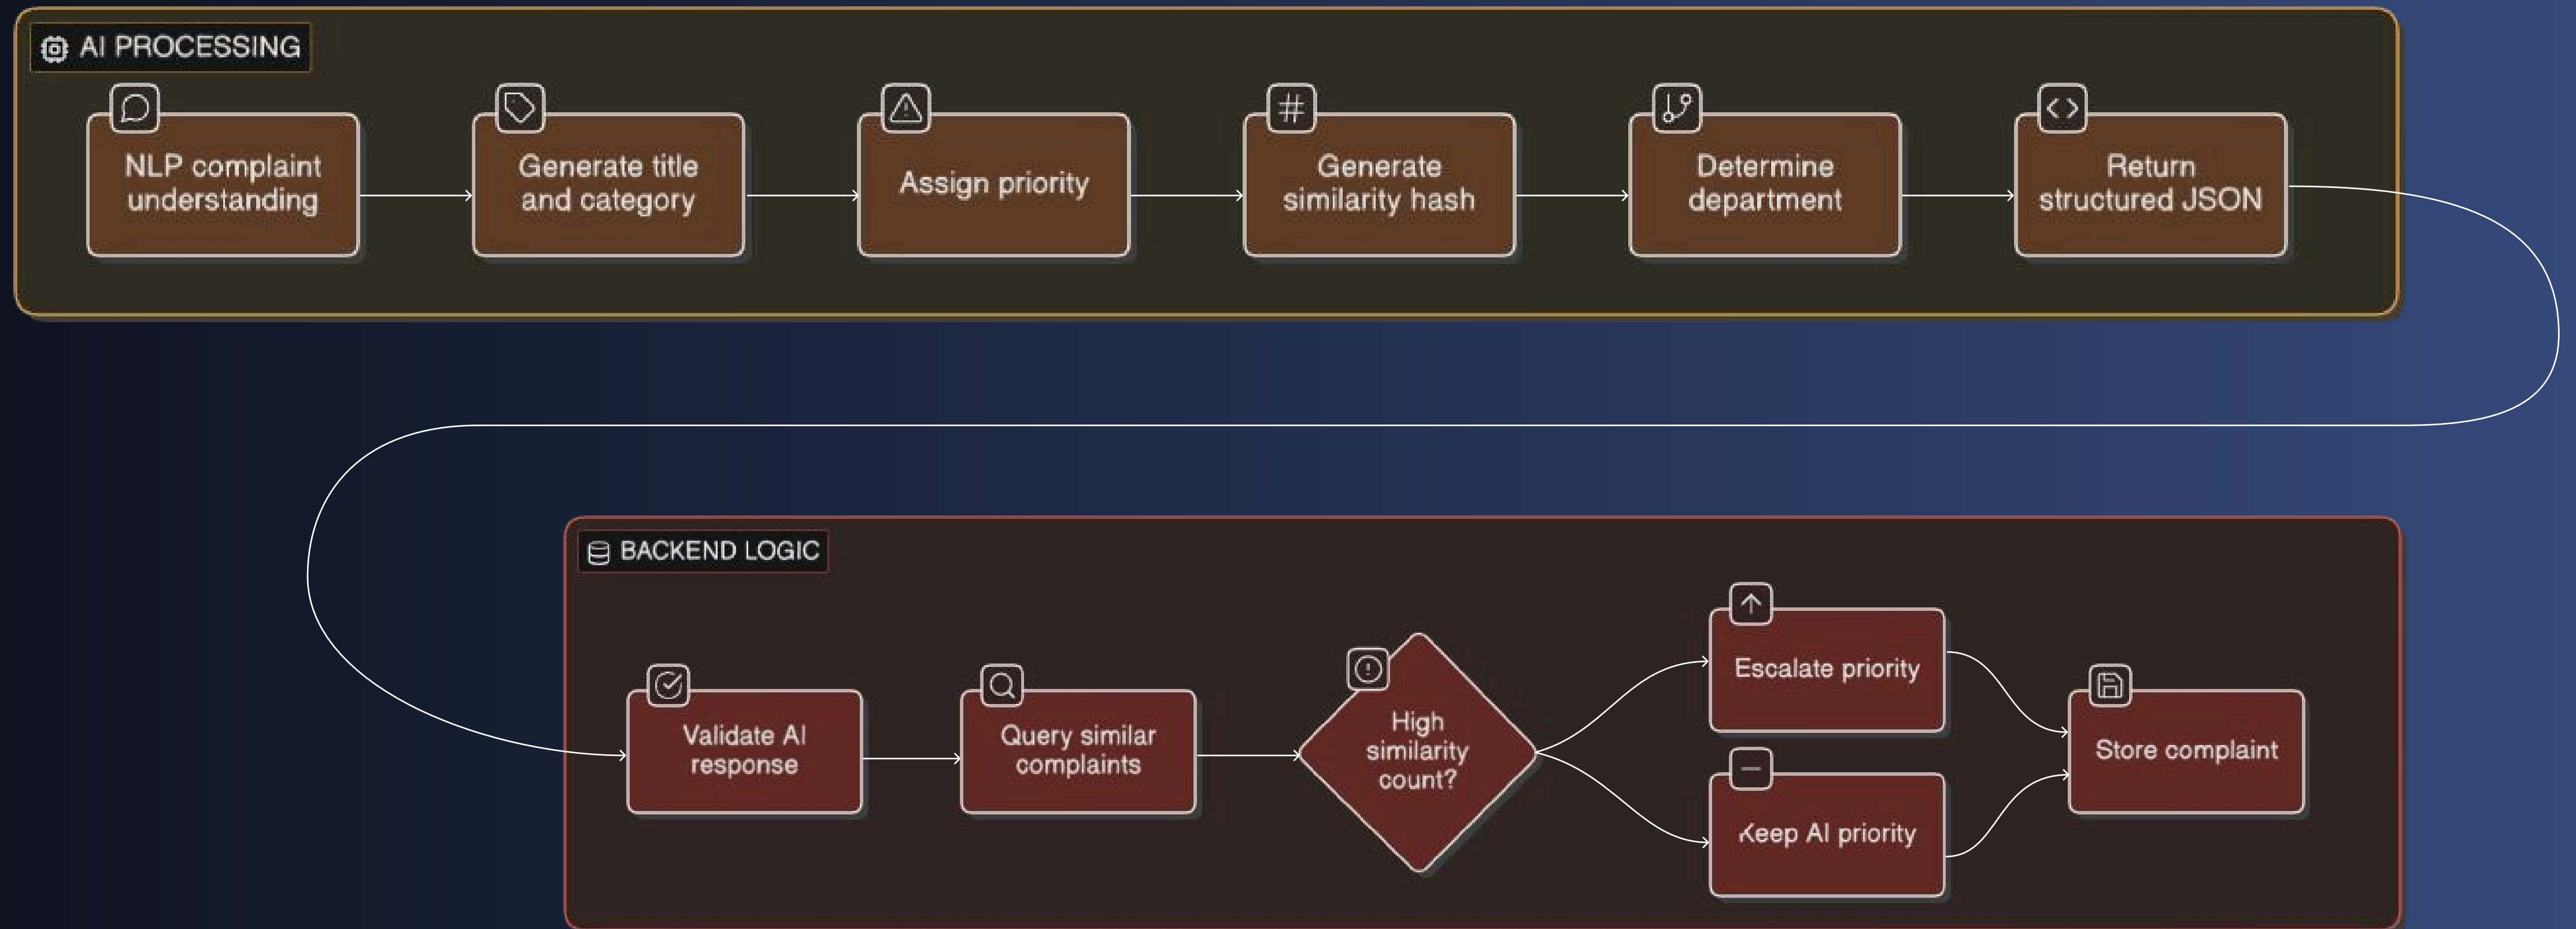

What Makes Our Solution Unique :

- AI-based photo + text interpretation
- Automatic department assignment without user selection
- **Duplicate complaint** detection & merging
- Visual proof-based complaint closure
- Department performance scoring system

Work flow

Ai layer + Backend Logic

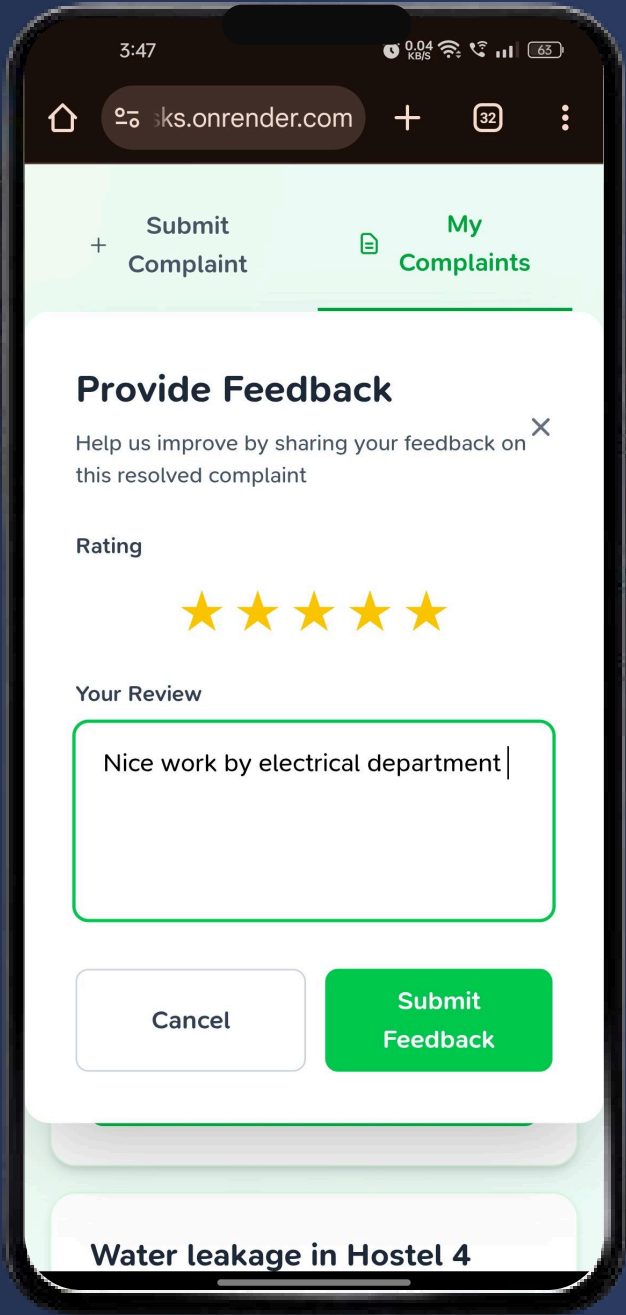

Reward System

Speed Points :

Time	0 - 24 hrs	24 - 48 hrs	48 - 72 hrs	72 - 96 hrs	96 hrs +
Points	15	10	5	0	-5 For every Next 24Hrs

Ratings :

★ ☆ ☆ ☆ ☆	-20
★ ★ ☆ ☆ ☆	-10
★ ★ ★ ☆ ☆	5
★ ★ ★ ★ ☆	10
★ ★ ★ ★ ★	20

Leader-board

Rank	Department	Points Rewarded per Complaint
1.	Electrical Maintenance Department	31
2.	Plumbing Department	28
3.	Infrastrucutre Department	19
4.	Student affairs	18

Why We Used Points Rewarded per Complaint instead of Total points :

We award points on a per-complaint basis to ensure a fair and balanced evaluation across departments. Since the number of reported issues can vary, a department that receives a higher volume of complaints would otherwise have more opportunities to accumulate points by resolving them. At the same time, another department may receive few or no complaints for an extended period, which would limit its ability to earn points and maintain its ranking. This approach helps create a more equitable performance comparison among all departments.

Business Model

Sustainable SaaS model for long-term institutional adoption

Revenue Model :

- Colleges pay for platform access on a yearly or multi-year basis.
- Cloud hosting, AI processing, maintenance & support included.
- Predictable recurring revenue model.
- Scalable across multiple campuses

1 Year Plan (Standard)

Includes:

- Full platform access for 1 year
- Admin dashboard & department panels
- AI complaint classification
- Cloud data storage
- Technical support

Data Policy:

- Data retained only during active subscription
- Secure archival & removal after expiry
- Fresh onboarding on renewal

3 Year Plan (Premium)

Includes:

- Includes all the Benefits of Standard plan
- Cost advantage over yearly renewal
- Free onboarding of new 1st-year student data every academic cycle
- Priority support
- Long-term data insights & analytics
- Performance trend report

Renewal Benefit:

- Continuous data history (no reset)

Thank You
